Motivated and detail-oriented software developer with experience in building web applications using Angular and NestJS. Strong foundation in Core Java, with expertise in object-oriented programming, exception handling, and design principles. Skilled in developing RESTful APIs, database management with MySQL, and front-end development with JavaScript. Passionate about problem-solving, optimizing application performance, and collaborating with teams to deliver scalable solutions. Enthusiastic about continuous learning and keeping up with emerging technologies.

- Angular
- NestJS
- Javascript
- Java
- HTML
- CSS
- JavaFX
- Linux
- IntelliJ Idea
- Visual Studio Code
- Python
- Swagger
- Primeng

CERTIFICATION

- Super-X 3.0 – Core2Web
- Java 2024 – Core2Web
- Postman API Fundamentals Student Expert
- Java Full Stack Development – Capegemini via Edubridge

WORK EXPERIENCE

Software Consultant-AstekBit Technologies **DEC 2024 - Present**

Angular Component Development: Collaborated with a cross-functional team to build dynamic, reusable Angular components, resulting in a 25% improvement in UI load times and a streamlined user experience.

Backend Optimization: Optimized backend processes and integrated efficient API endpoints, achieving a 40% reduction in response times and ensuring a seamless experience for a rapidly growing user base.

PROJECTS

Swayamsevak using JAVA FX: **30 Days**

Engineered a volunteer management platform that simulates over 100 events and volunteer registrations within a 30-day sprint. Integrated Firebase for real-time data simulation, optimizing operations and delivering a functional prototype rapidly.

Concepts Used: *OOP, JavaFX libraries, Exception Handling, Lambda Expressions, Firebase.*

20 javascript mini projects: **20 Days**

Developed 20 interactive JavaScript mini projects in 20 days, each showcasing real-time web functionality. Created apps like a Weather App pulling live API data, a dynamic Quiz App, and a conversational Chatbot. Wrote over 2000 lines of code employing DOM manipulation, event handling, API integration, and asynchronous JavaScript techniques..

Concepts Used: *DOM Manipulation, Event Handling, API Integration, Asynchronous JavaScript.*

Portfolio website:

Created a personal portfolio website using Angular 15 and PrimeNG in 10 days to showcase 10+ projects and skills. Designed a fully responsive UI with 5+ reusable components, ensuring compatibility across all screen sizes. Wrote 1000+ lines of TypeScript code to build a scalable, modern frontend reflecting strong development practices.

Concepts Used: *Angular, TypeScript, Responsive Design.*

Web browser using JavaFX: **30 Days**

Developed a user-centric web browser interface, leveraging Java concepts for streamlined functionalities including URL navigation, back and forward browsing, and seamless web content display.

Churn prediction using Machine learning: **153 Days**

Customer churn, refers to phenomenon where customers discontinue their relationship with a company, leading to a loss of revenue and market share. This project aims to create a machine learning model to predict which customers are likely to leave.
