SUMMARY

Motivated software developer skilled in **Angular**, **React**, **NestJS**, and **JavaScript**, with a solid grasp of **Java**. Experienced in building **RESTful APIs**, managing **MySQL** databases, and developing responsive front-ends. Familiar with Agile and Scrum methodologies, Test-Driven Development, **CI/CD** pipelines, Git version control. Strong in performance optimization, problem-solving, and team collaboration.

SKILLS

Languages: Java 8, Javascript, Python.

Technologies: Angular, React, Spring, Hibernate, NodeJS, NestJS, Swagger API, PrimeNG, Bootstrap, HTML5, CSS3, MySQL, JavaFX

Tools & Platforms:: Visual Studio Code, IntelliJ IDEA, Swagger, Postman API, Figma, Canva, Windows, Ubuntu.

EXPERIENCE

Junior Software Developer

December 2024 – Present

AstekBit Technologies

- **Angular Component Development:** Engineered reusable components and delivered a Dashboard summarizing file uploads, form statuses, RM metrics, and audit trails. Revamped the UI by updating the side panel and color scheme to match client requirements.
- **Backend User Master Development:** Developed high-performance RESTful APIs using **NestJS** and **MySQL** for User Master CRUD operations, and delivered corresponding **Angular** UI for create, edit, and view workflows.
- **Document Identification API with NestJS:** Developed and hosted an AI-powered Document Identification API on server using **NestJS**, integrating **Google Gemini** for intelligent data extraction and validation across 16+ document types, achieving 92% accuracy, 99.2% uptime, and reducing manual verification time and processing costs by over 50%
- **Policy Extraction API:** Developed a high-accuracy **NestJS** backend integrating PDF-to-image processing with **Google Gemini AI** to extract structured fields and normalized bounding boxes. Enabled precise multi-page data mapping and delivered optimized JSON outputs for downstream automation.

PROJECTS

Swayamsevak | *JavaFX, Spring MVC, ORM, Hibernate, REST API, MySQL, Angular*

30 Days

- Built an end-to-end platform, migrating from **JavaFX/Firebase** to **Angular** (TypeScript, RxJS) for a reactive UI, and architecting a **Spring Boot** backend with REST APIs, JWT security, and MySQL (Hibernate). Enabled volunteers to browse, filter, and join events in real time with 50% faster data retrieval

Portfolio website | *Angular, Typescript, Responsive Design*

- Created a personal portfolio website using **Angular 15** and **PrimeNG** to showcase 10+ projects and skills. Designed a fully **responsive UI** with 5+ reusable components, ensuring compatibility across all screen sizes. Wrote **TypeScript** code to build a scalable, modern frontend reflecting strong development practices.

Churn prediction using Machine learning:

150 Days

- Designed and developed the frontend interface using Python with tkinter to visualize churn predictions and user insights. Collaborated on building a machine learning model to identify customers likely to discontinue their service.

20 javascript mini projects | *DOM Manipulation, Event Handling, API Integration, Asynchronous JavaScript.*

- Developed 20 interactive JavaScript mini projects in 20 days, each showcasing real-time web functionality.

EDUCATION AND CERTIFICATIONS

- B.E. Information Technology, SPPU (2024) – **CGPA: 8.09**
- Java 2024, Super-X 3.0 – Core2Web (Core Java, OOP, Collections, Exception Handling).
- Java Full Stack Development – Capegemini via Edubridge.
- Postman API Fundamentals Student Expert.
