Abhijeet Mohite

+91-7507534299 | mohiteabhijeet74@gmail.com | LinkedIn | Portfolio | Pune, India

Professional Summary

Full-Stack Developer with **2+ years of experience** designing and shipping production-grade web applications using **Angular**, **NestJS**, and **MySQL**. Built and deployed an AI-powered Document Identification API using **Google Gemini LLM** achieving **92% accuracy across 16+ document types** and reducing manual verification effort by **50%+**. Strong command of REST API design, performance optimization, and Agile delivery.

Technical Skills

Languages: Javascript, TypeScript, Java 8, Python
Frontend: Angular, React, HTML5, CSS3
Backend: NestJS, Node.js, Spring Boot, RESTful APIs
Databases: MySQL, Query Optimization, ORM (Hibernate)
AI/ML: Google Gemini LLM, Prompt Engineering, Document Processing
DevOps & Tools: Git, Postman, Swagger/OpenAPI, CI/CD, VS Code, IntelliJ IDEA
Methodology: Agile Scrum, SDLC, System Design, Code Review, Debugging

Professional Experience

Junior Software Developer Apr 2025 – Sept 2026
AstekBit Technologies

- **Tech Stack:** Angular, NestJS, MySQL, TypeScript, Google Gemini LLM
  - **Engineered and deployed** an AI-powered Document Identification API using **Google Gemini LLM**, processing **16+ document types** with **92% accuracy** and **99.2% uptime**, cutting manual verification effort by **50%+**.
  - **Architected a multi-page document extraction system** with field-level prompt tuning, delivering structured JSON output with normalized bounding box coordinates and eliminating manual data entry for complex documents.
  - **Delivered 5+ end-to-end full-stack features** across the complete SDLC (design → dev → test → deploy) using **Angular** and **NestJS**, consistently meeting sprint deadlines in an Agile environment.
  - **Designed and optimized 10+ RESTful APIs** with **NestJS** and **MySQL**, applying query optimization and indexing strategies that improved average response time by **˜35%**.
  - **Built a real-time operational dashboard** in Angular with reusable components to monitor file-upload workflows, system health metrics, and document processing status, improving team visibility and reducing support queries.
  - **Drove code quality** through systematic peer code reviews and debugging sessions, enforcing SOLID principles and REST best practices across the team codebase.

Projects

Swayamsevak Platform | *Angular, Spring Boot, Hibernate/ORM, REST API, JWT, MySQL* 30 Days

- **Architected a full-stack volunteer management platform** using **Angular + Spring Boot**, implementing **JWT-based authentication** and role-based access control (RBAC) for secure, multi-role user flows.
- **Reduced data retrieval latency by 50%** through optimized Hibernate ORM queries, indexed joins, and a streamlined REST API layer, enabling sub-200 ms response times on primary endpoints.

Portfolio website | *Angular 15, Typescript, PrimeNG, Responsive Design*

- **Designed and launched a fully responsive personal portfolio** using **Angular 15 + PrimeNG**, featuring 5+ reusable components and showcasing 10+ projects with consistent rendering across mobile, tablet, and desktop.

Photographer Portfolio CMS | *React, NestJS, MySQL, Cloudinary, REST APIs*

- **Built a full-stack CMS** with **React (responsive UI)** and **NestJS REST APIs**, enabling portfolio management with **Cloudinary-based image optimization** and efficient MySQL data handling.

Churn Prediction — Machine Learning | *Python, scikit-learn, tkinter, Data Visualization* 150 Days

- **Collaborated on an ML pipeline** to predict customer churn and built the **Python/tkinter frontend** to visualize model outputs and user-level risk scores for non-technical stakeholders.

Education and Certifications

- **B.E. Information Technology** — Savitribai Phule Pune University (SPPU), 2024 **CGPA: 8.09 / 10**
- Claude Code in Action — **Anthropic**
- Java Full Stack Development — **Capgemini** via Edubridge
- Postman API Fundamentals — **Student Expert Certification**
